

CEWELD SPA 725

TYPE	High-alloyed tubular wire based on a CCrMoNb alloy for thermal spray.
APPLICATIONS	Applications that require Corrosion resistance in combination with high temperature and extreme wear.
PROPERTIES	High wear resistance with complex carbide structure. The deposit gives a extreme high hardness and is suitable for corrosion protection, homogeneous particle distribution. The spray deposit is only machinable by grinding with diamond tools.
CLASSIFICATION	
SUITABLE FOR	Cement industry, pumps, mixer blades, valves seals, bearings, magnetic sensors, dimensional restoration.
APPROVALS	
WELDING POSITIONS	
MECHANICAL PROPERTIES	
REDRYING	Not required
GAS ACC. EN ISO 14175
