| TYPE                                        | Nickel based high basic SMAW welding electrode. ( Type Alloy 690)                                                                                                                                                                                                                               |                            |                      |                    |                         |     |     |          |
| TOEPASSINGEN                                | CEWELD E NiCro 690 electrodes are used for welding of nickel-chromium-iron Inconel alloys 690 to themselves and 600 steels. Also for heterogeneous stainless and low-alloy steels. Soft arc, easily detachable slag, regular beads. Nuclear power plants, chemical industry.                    |                            |                      |                    |                         |     |     |          |
| EIGENSCHAPPEN                               | CEWELD E NiCro 690 has a higher Cr content which improves resistance to stress-corrosion cracking in the nuclear, pure water enviroment.                                                                                                                                                        |                            |                      |                    |                         |     |     |          |
| CLASSIFICATIE                               | AWS                                                                                                                                                                                                                                                                                             | A 5.11: ENiCrFe-7          |                      |                    |                         |     |     |          |
